Cost Certainty in Construction Means Budget Reliability and Risk Mitigation

POI Construction Solutions help designers, trades and clients save time, eliminate waste, and minimize deficiencies with an assortment of flexible solutions

COST CERTAINTY

We help end users, contractors and designers manage tighter budget and offset fluctuation.

FOCUS ON DETAILS

POI supports designers and coordinates with trades up front by providing visuals and details. This means fewer deficiencies, and schedule risk reduction.

STRESS-FREE PARALLEL CONSTRUCTION

Offsite prefab construction means less bodies and cleaner demolition

RISK MITIGATION

Shorter lead times for manufacturing allows time for changes to be made to design closer to delivery.

ACCURACY AND SPEED

Our partner software maps your project closely to budget and manufacturing. If you can draw it, we can build it.

PRODUCT SOLUTIONS

- Glass, Solid & Movable Walls
